151 Lubricant Spray

151 Lubricant Spray is designed to meet most applications where silicone based products would usually be used. 151 however does not present the same paintability restrictions as silicones and is therefore useful in the production of plastic and metal components as well as the lubrication of machine parts and moulding equipment etc.

151 Lubricant Spray has a temperature range of -10°C to $+100^{\circ}\text{C}$, this is more than adequate for most applications. 151 is formulated with colourless, non-toxic, non-staining concentrates to meet popular industrial, engineering, food and timber processes.

151 Lubricant Spray eliminates or reduces friction, sticking, adhesion, seizing, adhesion and wear. The carrier solvents blended with 151 also enhance its cleaning characteristics.

151 Lubricant Spray is also suitable for releasing moulded plastics.

Applications Include: The lubrication of curtain tracks, sliding doors and windows as well as other home wares. Can be used for lubricating industrial machinery, sewing and knitting machines, threads and zippers etc. Also used to lubricate treadmills, home gyms and fitness equipment as well as cleaning and lubricating plastic surfaces such as tables, benches, guides, conveyors, slides, hinges, cutting blades and heat sealers and other food packaging equipment.

Pack Sizes: 400g aerosol

Conditions of Sale: Chem Pack Pty Ltd shall not be liable for any loss, injury, damage or death, whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sales, supply, use or application of this product.
