SILICONE SPRAY

[Concentrated]

SILICONE SPRAY is most likely the best spray lubricant for general-purpose lubrication or release agent for moulding plastics.

SILICONE SPRAY is a formulated lubricant with a temperature range between – 30°C to +300°C. It is a blend of colourless, non-toxic and non-staining silicone concentrates designed to meet most industrial applications. **Silicone Spray meets the MIL-S-18660 Specification and is classified as Food Grade (Incidental Contact) for use in food packaging / manufacturing applications.**

SILICONE SPRAY eliminates or reduces friction, sticking, adhesion and wear. Because **SILICONE SPRAY** is clean and odourless, it is used in the food, electronics and plastics industries. Also widely used in maintenance of gym equipment. Sprayed on cones of thread for embroidery and sewing machines to eliminate sticking & thread breaks.

SILICONE SPRAY may prevent the adhesion of paints or adhesives. In these applications, we recommend "Paintable" products which retain the silicone characteristics without the disadvantages where paintability is required.

APPLICATIONS INCLUDE: Lubrication of curtain tracks, sliding doors and windows as well as other home wares. Suitable for lubricating sewing and knitting machines, threads and zippers. Ideal for lubrication of treadmills, home gyms and fitness equipment. Liberally sprayed on metal surfaces it can minimize effects of corrosion.

Can be used for cleaning and lubricating plastic surfaces such as tables, benches and guides and also applied to conveyors, slides, hinges, cutting blades and heat sealers. Widely used in the release of plastics in injection moulding, polyurethane and resin moulding processes.

Pack Sizes: 400g aerosol; 20L drum
