KARBY KLEEN

Karby Kleen is a specially formulated aerosol cleaning system for the automotive industry. Formulated with special cleaners and additives, it cleans carbon deposits to remove them from carburetors.

Karby Kleen contains powerful anti-carbon degreasing agents that go to work on the intricate crevices within carburetors to remove grease, dirt and tough carbon deposits that accumulate in carburetors and injection systems. This can be done with components in place avoiding dismantling – saving time.

Karby Kleen is a great time and money saver and enhances engine performance. Use on carburetors, chokes and heat riser systems for maximum performance and engine life.

Directions: Shake can well. Aim into carburetor and spray liberally. To speed the effectiveness, agitate surface with a brush or rag. Flush or wipe excess and removed deposits prior to use. **Do not use with motor running.**

Pack size: 400g aerosol

Conditions of Sale: Chem Pack Pty Ltd shall not be liable for any loss, injury, damage or death, whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sales, supply, use or application of this product.
