## 114B Silicone Fluid

---

**114B SILICONE FLUID** is considered the best spray lubricant for general-purpose lubrication. 114B Silicone Fluid is a formulated lubricant with a temperature range between  $-30^{\circ}\text{C}$  to  $+200^{\circ}\text{C}$ . It is a blend of colourless, non-toxic and non-staining silicone concentrates designed to meet most industrial applications.

**114B Silicone Fluid** eliminates or reduces friction, sticking, adhesions and wear. Because silicone fluid is clean and odourless, it is used in the food, electronics and plastics industries.

**Note:** Silicone Fluid may prevent the adhesion of paints or adhesives. In these applications we recommend "Paintable" products which retain the silicone characteristics without the paintability disadvantages.

**Applications** include the lubrication of automotive components, electrical and ignition systems, curtain tracks, sliding doors, windows, and other homeware, lubricating sewing and knitting machines, threads, zippers etc.

114B Silicone Fluid is especially suited to use on guillotine and cutting blades for foam of various density and paper. It is also widely used in the release of plastics in injection moulding, polyurethane and resin moulding processes. May also be used for Epoxy, Latex (for concrete) and Silicone Rubber moulds.

Pack Sizes: **400g aerosol; 25 litre drum**

<p><b>Conditions of Sale:</b> Chem Pack Pty Ltd shall not be liable for any loss, injury, damage or death, whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sales, supply, use or application of this product.
