High Viscosity 498 MOULD RELEASE AGENT For the Rubber Industry

498 is a high viscosity release agent used in the moulding of all rubber components including automotive tyres. As an emulsion, it may be diluted in water many times its own fluid weight, depending on the application.

498 can also be used as a polish / restorer on vinyl, fiberglass and other materials used in boats and caravans. Polished onto and into the surface will minimize the effects of age and the elements.

Nature of the Product: 498 is based on a 80,000 centistoke silicone oil and therefore contains a very high viscosity solids level, giving optimum efficiency as a long lasting mould lubricant. Its efficiency may continue up to a dilution rate of beyond 1 part 498 to 100 parts water.

Application: add to water and stir vigorously until it becomes a homogeneous mixture. The level of dilution varies greatly according to the particular application. Our consultant will be able to advise the user in this regard, but a commencing rate of dilution is 1 part 498 to 30 parts water. This is considered to be an average starting point. Adjustment may then be made to the optimum dilution proportion. As all emulsions tend to settle in storage, stir the mixture gently before each days' usage. The mixture may be sprayed or brushed on as frequently as required.

Safety Precautions: There are no hazardous conditions in the use of 498, but the product may cause some eye irritation. In case of irritation, flush eye with plenty of water. If discomfort continues seek medical attention.

Pack size: 25 litre drum

Conditions of Sale: Chem Pack Pty Ltd shall not be liable for any loss, injury, damage or death, whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sales, supply, use or application of this product. The supply of this product is on the express condition that the purchaser does not rely on Chem Pack's skill or judgement in purchasing or using the same and every person dealing with this product does so at his own risk absolutely. No representative of Chem Pack has any authority to add to or alter these conditions.
