## TAP LUBE

---

**Tap Lube** is a highly efficient lubricant for all kinds of metal cutting. It not only reduces friction but also washes, cleans and cools the drill bits and the metal being processed.

**Tap Lube** provides for more efficient machining of metals by giving closer tolerances, better surface finishes and, most importantly, prolongs the life of drill bits and other cutting tools.

**Tap Lube** can be applied from the aerosol can by spraying directly onto bits or cutting blades and onto the item to be drilled or cut. The spray is reasonably direct which helps to minimize waste or over spray. Alternatively **Tap Lube** is available as a fluid that can be poured onto the work, pour some off into smaller container to dip the bits into (avoids contamination of the fresh fluid) or transferred into plastic spray bottles.

**Directions:** Direct a jet of Tap Lube spray onto the cutting area while drilling or cutting. Take care not to inhale any vapours.

Apply to drill bit by dipping into **Tap Lube** or apply with brush to drill bit or metal to be drilled. Drill piece size, metal size, drill speed and other factors may effect the lubrication therefore application is recommended as required. Sticking drill pieces, metal colouring and smoking are all indications that more lubrication is required.

**Pack Sizes:** 400g aerosol can

**Conditions of Sale:** Chem Pack Pty Ltd shall not be liable for any loss, injury, damage or death, whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sales, supply, use or application of this product. The supply of this product is on the express condition that the purchaser does not rely on Chem Pack's skill or judgement in purchasing or using the same and every person dealing with this product does so at his own risk absolutely. No representative of Chem Pack has any authority to add to or alter these conditions.
