Thermocut

Thermocut is one of the latest metal cutting products, formulated from our synthetic technology.

Thermocut is specifically designed to replace present lubricants used in the drilling processes of engineering. In operation Thermocut will actually melt at normal drilling temperatures; becoming a light liquid which will penetrate the cutting process; lubricating and cooling all points of contact between the drill piece and the article being worked. This makes most other lubricants that stay only on the surface or 'flick-off' the metal or the drill, obsolete. After use Thermocut will wash-off the work and drill piece with light thinners or soap and water, after which the surface is fully "paintable".

Thermocut is non toxic, contains no solvents, silicones or hydrocarbons and is food grade.

Thermocut can be applied with either a brush or the drill piece may be 'dipped' in the container. If Thermocut becomes too contaminated to work with, (ie. Swarf etc is dropped in the tin), the tin may be heated until Thermocut has melted and run through a wire sieve, leave to cool and it is as good as new!

Directions: Apply to drill piece by dipping drill into Thermocut paste or apply with brush to drill piece or metal to be drilled. Drill piece size, metal size, drill speed and other factors may effect the lubrication therefore application is recommended as required. Sticking drill pieces, metal colouring and smoking are all indications that more lubrication is required.

Pack Sizes: is available in 500g tin

Conditions of Sale: Chem Pack Pty Ltd shall not be liable for any loss, injury, damage or death, whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sales, supply, use or application of this product. The supply of this product is on the express condition that the purchaser does not rely on Chem Pack's skill or judgement in purchasing or using the same and every person dealing with this product does so at his own risk absolutely. No representative of Chem Pack has any authority to add to or alter these conditions.
