CHAIN-TAK (Clear Foaming)

Chain-Tak is designed for special lubrication of chains, chain drive systems, conveyors and gears. Chain-Tak is formulated with adhesive additives to enhance the life and performance of the chains and associated machinery. Lack of lubrication of small moving parts can result in expensive breakdowns and downtime.

Chain-Tak is a clear foaming spray that will clean and lubricate and is most suitable where colour staining is an issue. This will actually stick to the chain after penetrating the links where oil lubrication is necessary.

Chain-Tak has a temperature range of -10°C to $+200^{\circ}\text{C}$. This temperature range is important to applications involving elevated temperatures where conventional greases or oils will literally "fall out".

Chain-Tak is also moisture, solvent and corrosion resistant; these factors are important in situations where demands are placed on the lubrication of the machinery. Chain-Tak will significantly improve the operation under these conditions.

Chain-Tak once dry will not drip or flick off the chain or application, and will adhere at extreme speeds and will not be affected on sharp turns or high ration gear systems.

Applications: Chain-Tak is suitable for use on all chains, gears, drive-shafts, drive systems, cables and pulleys and is not detrimental to rubber or synthetic O rings in chain linkages.

Pack Sizes: 400g aerosol; 20 litre drum

<p>Conditions of Sale: Chem Pack Pty Ltd shall not be liable for any loss, injury, damage or death, whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sales, supply, use or application of this product. The supply of this product is on the express condition that the purchaser does not rely on Chem Pack's skill or judgement in purchasing or using the same and every person dealing with this product does so at his own risk absolutely. No representative of Chem Pack has any authority to add to or alter these conditions.</p>
