“BARRICADE” FABRIC, CARPET & TEXTILE PROTECTANT

“Barricade” Fabric Protectant is a polymer formula used to protect all kinds of fabrics and textiles. It may also be used on carpets, curtains and soft furnishings as well as clothing, shoes and boots, tents & backpacks. Other applications include the protection of velour and cloth car seats, domestic linen and upholstered furniture, car & boat seats, canopies, leather, suede and most sporting and ski wear.

“Barricade” Fabric Protectant used as required (dependant on actual usage of fabric) will add to the life of the product as well as helping it's appearance remain looking newer for longer. By protecting the fibres of the fabric, staining or discoloration resulting from spills of food, drinks etc will be minimized. Similarly, “Barricade” protection reduces the appearance of the product “aging” as a result of the effects of the natural oils off people's skin marking or staining upholstery or car seats.

Directions for Use:

“Barricade” Fabric Protectant is best applied by spraying directly onto the surface from approximately 10 – 15 centimeters (4-6 inches) away from the surface with slow, even sweeps until the fabric or material shows uniform ‘wetness’ and allow it to dry for approximately 2-3 hours.

Velvets and shiny surface synthetic fabrics require a lighter application that should be sprayed slightly closer to the fabric. Too heavy an application may cause a white deposit to show on the fabric when dry, this can be removed with light brushing.

Care of Treated Fabric or Surface:

When spillage occurs, gently mop or absorb the spillage from the surface with cloth or toweling. Avoid hard rubbing.

Regular cleaning or vacuuming will prolong the protectant and application life.

Pack Size: 400g aerosol; 4 x 5 litre cans & 20 litre drums
