Concentrated Silicone Spray

Silicone Spray is the best spray lubricant for general-purpose lubrication or release agent for moulding plastics.

Silicone Spray is a formulated lubricant with a temperature range between – 30°C to +300°C. It is a blend of colourless, non-toxic and non-staining silicone concentrates designed to meet a range industrial applications.

Silicone Spray meets the MIL-S-18660 Specification and is classified as Food Grade (Incidental Contact) for use in food packaging / manufacturing applications.

Features:

- Reduces friction, sticking, adhesion and wear.
- Odourless
- Lubrication suitable for High Temperature

Recommended Uses:

- Mould Release Agent – Injection & Resin Moulding
- Lubricate gym equipment ie. Treadmills and other fitness machines
- Embroidery and Sewing machines, eliminating thread sticking and breakage
- Free stuck zippers and lubricate
- Lubricate curtain tracks, sliding doors and windows, zippers
- Printing Industry
- Lubricate conveyors, chains, hinges, cutting blades, heat sealers, and much more
- Create slip on plastic and steel benches
- Lubricate valves, rubber seals and o'rings
- Minimise effects of corrosion on metal surfaces

Additional Information:

Silicone Spray may prevent the adhesion of paints or adhesives. In these applications, we recommend "Paintable" products which retain the silicone characteristics without the disadvantages where paintability is required.

Pack Sizes:

- 400g Aerosol cartons of 12
- 20 Litres
